

## Safe'n'SOUND Self Storage

Metroll Newcastle is the preferred supplier for roofing and fencing products for the fast growing Safe'n'SOUND Self Storage facilities. All six Safe'n'SOUND Self Storage facilities in the Hunter and Port Macquarie have used Metroll Newcastle for purlins, Colorbond® and zinc roofing and fencing building materials.

Mr Stephen Wile, founder of the six facilities, stated:

"I have building expertise and in my opinion, Metroll products are of the highest engineering quality. We have developed an excellent business relationship with our Metroll sales consultant who liaises with the roof plumber and steel erector to ensure that the Metroll products are correctly installed. Our Metroll sales consultant is vigilant in after sales service and support."

Safe'n'SOUND Self Storage facilities tried out Metroll products for their first facility in Port Macquarie. As Metroll Newcastle delivered on time, provided competitive prices and responsive sales service and support, Metroll products are specified in the engineering drawings of all six facilities.

The six Safe'n'SOUND Self Storage facilities incorporate the best security features available today. Self-storage is made easy, hassle free and can be ordered and paid for online. These facilities offer storage solutions to suit individual needs and budgets. Each facility manager helps customers with storage advice, estimating what size unit and the best types of packing materials for each project.

All facilities have wide driveways for easy manoeuvring; incorporate trolleys to facilitate product movement and all units are individually alarmed. Other security features include individual pin code access, 24 hour recorded video surveillance, after-hour access, and security fencing and lighting.

Safe'n'SOUND Self Storage is proud to have won the Self Storage Association of Australasia "Best Self Storage Facility in Australasia Award" on three occasions.
