

UNI-DROP™

The Universal Gutter Outlet

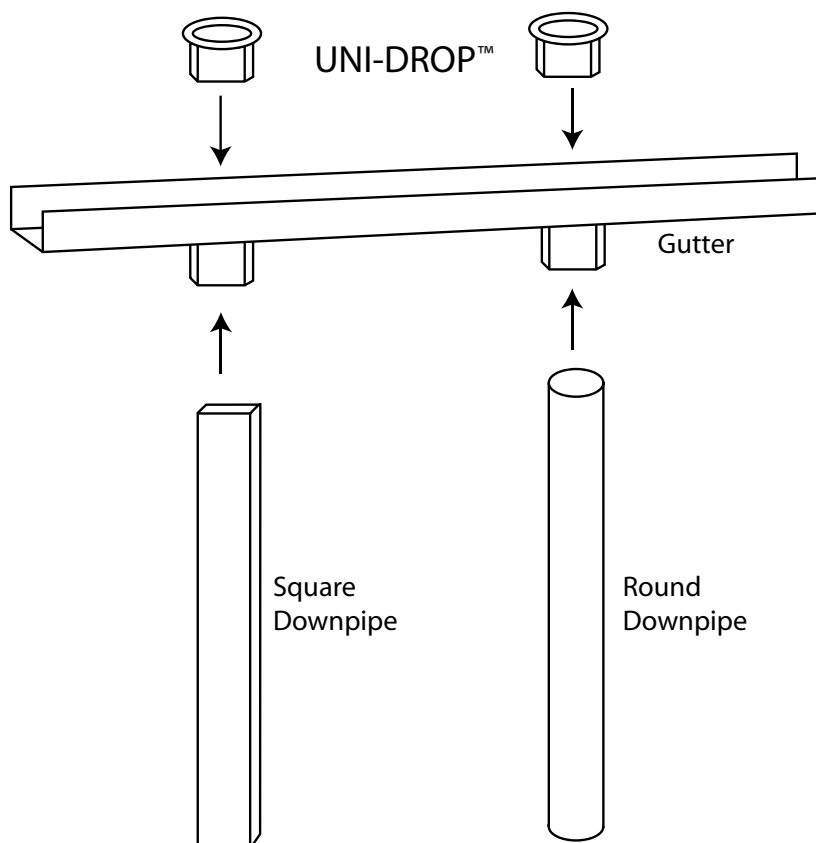

About

The UNI-DROP™ is a pressed metal gutter outlet to suit both round and square gutter downpipes. It is manufactured using multi-stage deep draw technology and incorporates centre alignment marks for precise installation.

Made from high-grade material, the UNI-DROP™ is durable and resilient to the harsh Australian environmental conditions.

Designed to allow accurate downpipe alignment, the 5mm give provides fitment of square downpipes. The UNI-DROP™ is storage efficient and makes gutter replacement unnecessary when changing downpipe profiles.

It is cost effective as it replaces existing round and square drops with the 2 in 1 UNI-DROP™. It is a universal outlet that is designed to fit 90mm round or 100 x 75mm square downpipe.
