

Mini-Corodek®

Decorative Sheeting

Mini-Corodek® offers a blend of sophisticated decorator styling with the practicality of COLORBOND® steel. It is ideally suited to both exterior and interior use. Mini-Corodek® is versatile, modern and artistic-its application being limited only by the imagination.

Manufactured with an overall profile depth of 6mm and width of 877mm, Mini-Corodek® has the same traditional shape as Metroll Corodek® but on a much-reduced scale.

Its elegant profile lends itself to unlimited applications and is ideally suited for ceilings and soffit linings (underside of arch, hung parapet, or opening), feature walls and partitions, screens and small awnings, not subject to any foot traffic.

It can be used with the corrugations vertical or horizontal, but it is not intended as a principal roofing material. The longitudinal corrugations of the product provide substantial strength and rigidity along the length of the sheet while allowing it to be curved across its width.

Mini-Corodek® is available in a range of attractive colours in COLORBOND® pre-painted steel, ZINCALUME® zinc/aluminium alloy coated steel and Galvanised – zinc coated steel.

Dimensions

Mini-Corodek® is 877mm wide (±5mm) with a cover width of 825 (±5mm). It has 33 small corrugations of 25mm centres and a rib height of 6mm. Base Metal Thickness: 0.42mm.

Support Spacings	End Spans	Internal Spans
Walling application	600	900
Soffit application	600	600
