

Fencing

Metline

Metline Fence incorporates a profiled sheet that is identical both sides. It is manufactured in S-11 Hi-strength panel post that has been fully tested and certified to conform to Australian standard AS4600:1996.

It comes in a range of COLORBOND® colours to blend into your home and garden environments. Its quality oven baked paint finish is designed for the harsh Australian conditions. A Metline Fence is low maintenance and requires no re-painting for years.

As Metline Fence has nil gaps, it provides greater security to your boundaries and protects the privacy of your family activities. It provides a perfect screen between neighbouring gardens and is cost effective compared to timber fencing.

The fence panels are available in standard sizes to suit the following fence heights:

- 1200mm
- 1500mm
- 1800mm

The panels also come to suit a fence height of 2100mm. These panels are generally for raking, although they can be used for 2100mm high fences. Please specify rail lengths when raking a fence.

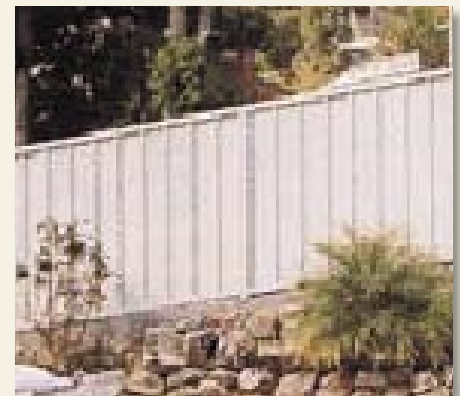

Colourfence

Colourfence is manufactured from COLORBOND® and ZINCALUME® Steels. A fencing infill sheet is available in standard lengths and provides a beautiful double-sided finish. These panels are suitable for use with Metroll post and rail. Colourfence panels can be offset with different colours in the post and rail selection. These infill sheets are not identical on both sides.

Colourfence panels are available in standard sizes to suit the following fence heights:

- 1200mm
- 1500mm
- 1800mm

The Colourfence panels also suit a fence height of 2100mm. These panels are generally for raking, although they can be used for 2100mm high fences. Please note that is important to specify rail lengths when raking a fence.

Fencing

Post & Rail

Post and Rail is manufactured from ZINCALUME® and COLORBOND® Steels. Metroll post and rail has been custom engineered to be long lasting, durable and aesthetic. It is suitable for high wind areas of up to 119 kmph, provided that the fence has been installed in accordance with instructions. Metroll post and rail complies with AS1170.2.

Metroll post is available in the following heights:

- 1800mm
- 2100mm
- 2400mm
- 2700mm
- 3000mm

Metroll rail is available in the following lengths:

- 2365mm
- 3125mm

Gates

Metroll gate solutions are manufactured from ZINCALUME® and COLORBOND® Steel and are designed to complement Metroll steel fences. These gates are also suitable for other types of steel and wooden fence. These are available with infill sheets to match your existing fence.

Metroll gates are available in the following heights:

- 1200mm
- 1500mm
- 1800mm

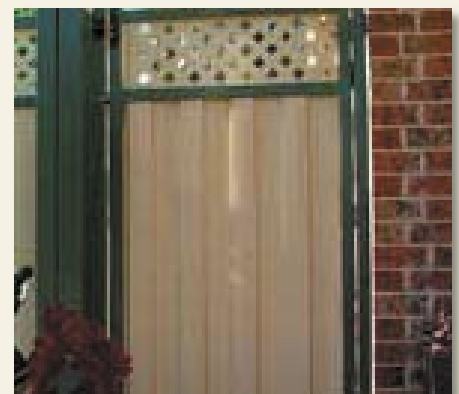

Accessories

Metroll offers fencing accessories that complement and add to the appearance of your home and surrounds. Components can be mixed and matched from the wide range of colours available.

Fencing accessories include:

- Coloured post caps
- Coloured lattice top panels

Lattice fence offers attractive steel lattice and post caps as optional extras to design and construct a fence that is good looking and robust. All components are available in a wide range of colours and can be mixed and matched.
