

Water Tanks - Rainwater Management Systems

Aquaplate® polymer-coated steel is Australia's premier tank-making material. It combines durability, strength, light weight, performance and is backed by a 20-year written manufacturer's warranty.

Aquaplate® tanks will not crack or split, do not suffer degradation from UV radiation and are flexible in design. They come in five colours - Galvanised Silver, Paperbark, Pale Eucalypt, Deep Ocean and Woodlands Grey.

Aquaplate® Steel has been developed specifically for the water tank market. It has a food-grade surface which helps ensure your water tastes clean and fresh, free from any tainting from the tank itself. It's for this reason that a tank made from Aquaplate® Steel stands out from the rest.

A rainwater tank made from Aquaplate® Steel complies with the tough Australian Standard on the use of plastic materials for food contact use (AS2070 part 2). In effect, it means Aquaplate® Steel is deemed completely safe for the storage of drinking water for human consumption.

Tanks made from Aquaplate® Steel are equally at home in the bush or the city. That's because with the range of colours and many sizes available, you can choose a tank to perfectly compliment your home and your lifestyle - no matter where you live.

Easy to transport and install (either at ground level or raised for gravity feeding) lightweight steel tanks are the natural choice for both city and country living.

More and more urban planning authorities - and homeowners - are recognising the environmental importance and practical cost savings associated with water recycling. That's why tanks made from Aquaplate® Steel are finding their way into more city backyards.

Water Tanks - Rainwater Management Systems

Traditional Tanks

- ◆ Traditional tanks are designed for open areas
- ◆ Available in a wide range of sizes
- ◆ Tanks allow for unit sizes that range from 100 gallon (450 litre) up to 5100 gallon (23184 litre)
- ◆ Tank height can vary from 635mm to 2460mm
- ◆ Tank diameter can vary from 960mm to 3600mm
- ◆ Custom sizes also available
- ◆ Can be made to fit existing stands or bases
- ◆ Ease of installation
- ◆ The look that associates with traditional Australian values

Slimline Tanks

- ◆ Slimline tanks are designed for confined spaces
- ◆ Available in a wide range of sizes
- ◆ Tanks allow for unit sizes that range from 150 gallon (480 litre) up to 700 gallon (3200 litre)
- ◆ Tank height can vary from 780mm to 1540mm
- ◆ Tank length can vary from 1200mm to 2400mm
- ◆ Tank width can vary from 600mm to 1150mm
- ◆ Custom sizes also available
- ◆ Ease of installation
- ◆ Modern in appearance
- ◆ Ideal for under eaves and side of house application

Modular Tanks

- ◆ Modular tanks are designed for all spaces
- ◆ Tanks allow for unit sizes that range from 330 gallon (1500 litre) up to 394 gallon (1800 litre)
- ◆ Tank footprint 1020mm x 1020mm
- ◆ Custom sizes also available
- ◆ The revolutionary tank has outstanding design frames that allow for:
 - Ease of installation
 - The ability through their connections to drain and fill at the same time
 - The ability to link module to module
